

1 **In the Specification**

2 In the Specification, please replace the text appearing on page 1, line 1
3 through line 19 with the following:

4
5 **-- RELATED APPLICATIONS**

6 The following patent applications are related to the present application,
7 are assigned to the assignee of this patent application, and are expressly
8 incorporated by reference herein:

- 9
- 10 • U.S. Patent Application Serial No. 09/599,298, entitled "Single
11 Window Navigation Methods and Systems", bearing attorney docket
12 number MS1-560us, and filed on the same date as this patent
13 application;
14 • U.S. Patent Application Serial No. 09/599,806, entitled "Methods
15 and Systems of Providing Information to Computer Users", bearing
16 attorney docket number MS1-557us, and filed on the same date as
17 this patent application;
18 • U.S. Patent Application Serial No. 09/599,299, entitled "Methods,
19 Systems, Architectures and Data Structures For Delivering Software
20 via a Network", bearing attorney docket number MS1-559us, and
21 filed on the same date as this patent application;
22 • U.S. Patent Application Serial No. 09/599,813, entitled "Authoring
23 Arbitrary XML Documents Using DHTML and XSLT", bearing
24 attorney docket number MS1-583us, and filed on the same date as
25 this patent application;
- 26 • U.S. Patent Application Serial No. 09/599,812, entitled
27 "Architectures For And Methods of Providing Network-based
28 Software Extensions", bearing attorney docket number MS1-586us,
29 and filed on the same date as this patent application;
30 • U.S. Patent Application Serial No. 09/599,086, entitled "Task
31 Sensitive Methods And Systems For Displaying Command Sets",
32 bearing attorney docket number MS1-562us, and filed on the same
33 date as this patent application.--

1 In the Specification, please replace the paragraph on page 31, lines 12-22
2 with the following:

3
4 -- Step 1200 provides a package manifest creation tool. This tool can be a
5 software tool that resides on an extension author's machine. Step 1202 receives
6 information pertaining to an extension directory as a first input parameter. Step
7 1204 determines whether there is any file group information or load dependency
8 information provided by the extension author. If there is, step 1206 receives the
9 information as an input parameter. Step 1208 determines whether there is any file
10 usage statistic information. Such information can be provided, in one
11 embodiment, through the use of scenario runs as described above. If such
12 information is provided, then step 1210 receives the information as an input
13 parameter. Step 1212 then uses all of the information provided as input
14 parameters to generate a manifest automatically.--
